

Senior Frontend Engineer

MONA FOUAD

Zürich | +41 76 202 9269 | fouad.mona@gmail.com | monafouad.dev | LinkedIn: mona-fouad-shafik | EU citizen, B permit

PROFESSIONAL SUMMARY

Senior frontend engineer with 15 years of experience creating polished interfaces for complex digital products. Proven track record of building shared component systems, translating detailed designs into production UI, and owning product development from concept through release. Combines a strong eye for design with a focus on component quality, accessibility, and maintainable frontend foundations for both human developers and AI agents.

CORE SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind, Panda CSS

Product and UX: End-to-end product development, product flows, interaction design, visual systems, Figma

AI interfaces: Streaming LLM responses, WhisperX voice transcription, dynamic model-output handling

Backend and data: Supabase, Postgres, Row Level Security, Edge Functions, Realtime, REST APIs

Design systems, testing and tooling: Storybook, design systems, Vitest, Playwright, Claude Code, Git, GitHub, Vite, Webpack, CI/CD

Ways of working: Cross-functional collaboration, clear communication, independent ownership, comfortable working through ambiguity

EXPERIENCE

Cicla | Founder & Solo Engineer | 2026 – present

Independent cross-platform consumer product taken from concept to a working TestFlight release.

Key achievement: Took Cicla from initial concept to a working TestFlight product as sole engineer, owning product definition, UX, architecture, implementation, testing and release.

- Designed and built the product across a React and TypeScript frontend, Capacitor iOS application and Supabase data layer, making product and technical decisions independently.
- Shaped evolving product ideas into clear flows, interaction patterns and a coherent product experience.
- Established automated testing across core calculations, data flows and critical user journeys, allowing the product to evolve without destabilizing existing behaviour.

Private product walkthrough available upon request.

Arpia AG / PHOENIQS | Frontend Developer | May 2023 - November 2025

Frontend, design-system and AI-interface development for a Swiss sovereign cloud and enterprise AI platform.

Key achievement: *Migrated the complete Vision Apartments customer website from AngularJS to React and TypeScript as part of a three-person frontend team, completing the work in approximately three months with a stable release and few post-launch issues.*

- Built and maintained a shared React component system with Storybook and Panda CSS, improving consistency and reuse across the frontend codebase.
- Built conversational AI interfaces combining streamed LLM responses, voice recording, WhisperX transcription and dynamically rendered content.
- Developed frontend patterns for incremental and variable model output, keeping the layout and interaction stable as responses were generated.
- Collaborated with backend engineers to integrate AI services and translate API responses into clear, usable customer-facing interactions.
- Modernized parts of the frontend from AngularJS to TypeScript and Tailwind and introduced Vitest and Playwright coverage to protect key interface behaviour.
- Delivered responsive and accessible interfaces that behaved consistently across devices.

White Hat Gaming | Frontend Developer | November 2019 - May 2023

Key achievement: *Implemented a frontend payment interface for Sightline Play+, a major US gaming payment platform, as part of a time-critical team rollout supporting US casino launches.*

- Built Angular, TypeScript and RxJS features for a high-traffic B2B platform used to manage complex operational workflows.
- Designed and developed an internal operational dashboard from the ground up, collaborating with product and UX to turn complex requirements into a clear interface.
- Integrated REST APIs and contributed to peer code reviews, supporting consistent implementation across the frontend codebase.

EARLIER EXPERIENCE

Various roles | Frontend Developer / Designer | 2010 - 2019

- Delectatech (2018-2019): Designed and developed the frontend for a food-data analytics product and created the company's visual style guide.
- Suntransfers (2014-2016): Led a website redesign informed by UX research, improving the clarity, trust and conversion of the customer experience.
- Lastminute (2011-2014): Transformed the local website into a responsive experience, improving its usability across desktop and mobile.
- Additional contract work: MusicMap Global, Lopesan, and Pisos & HabitatSoft.

EDUCATION & PROFESSIONAL DEVELOPMENT
